

Cuddeback 20 Megapixel IR Model H-1453

Our best 20MP Image Quality

Industry leading 1/4 second trigger speed

Cuddeback 20MP IR features legendary 1/4 second trigger speed and Super-Fast Recovery Speed - so the camera is ready for the next picture within 1 second of taking the first. The result is that Cuddeback can capture two photos before many cameras can capture one.

And the pictures are incredible - 20MP color images when shot in daylight and black and white images when shot at night.

On top of performance, Cuddeback's Super Simple Setup makes setup and deployment virtually fool proof. Spend more time scouting and less time messing with the settings.

Cuddeback's Super Simple Setup makes setup and deployment virtually fool proof. Spend more time scouting and less time messing with the settings.

Cuddeback 20MP IR. Compact, rugged and ready to use, this is Cuddeback's premier trail camera.
